

Pathfinder Village-St. Croix Owners Association, Inc.
Outline to Follow for 40% Rough Opening / Glass Requirements in Living Spaces
Revised April 17, 2003

First Wall $\frac{\text{_____}}{\text{(H. Inches - 36 in.)}} \times \frac{\text{_____}}{\text{L. Inches}} = \frac{\text{_____}}{\text{Sq. In.}}$

Second Wall $\frac{\text{_____}}{\text{(H. Inches - 36 in.)}} \times \frac{\text{_____}}{\text{L. Inches}} = \frac{\text{_____}}{\text{Sq. In.}}$

Third Wall $\frac{\text{_____}}{\text{(H. Inches - 36 in.)}} \times \frac{\text{_____}}{\text{L. Inches}} = \frac{\text{_____}}{\text{Sq. In.}}$

Fourth Wall $\frac{\text{_____}}{\text{(H. Inches - 36 in.)}} \times \frac{\text{_____}}{\text{L. Inches}} = \frac{\text{_____}}{\text{Sq. In.}}$

Added Together = $\frac{\text{_____}}{\text{Total Sq. In.}}$

$\frac{\text{Total Square Inches}}{\text{_____}} \times 40\% = \text{_____}$ **(Amount of Rough Opening Needed in Square Inches)**

To Determine How Much Rough Opening You Have

$\frac{\text{_____}}{\text{H. Inches}} \times \frac{\text{_____}}{\text{W. Inches}} = \frac{\text{_____}}{\text{Sq. In.}} \times \frac{\text{_____}}{\text{\# Windows}} = \frac{\text{_____}}{\text{Sq. In.}}$

$\frac{\text{_____}}{\text{H. Inches}} \times \frac{\text{_____}}{\text{W. Inches}} = \frac{\text{_____}}{\text{Sq. In.}} \times \frac{\text{_____}}{\text{\# Windows}} = \frac{\text{_____}}{\text{Sq. In.}}$

$\frac{\text{_____}}{\text{H. Inches}} \times \frac{\text{_____}}{\text{W. Inches}} = \frac{\text{_____}}{\text{Sq. In.}} \times \frac{\text{_____}}{\text{\# Windows}} = \frac{\text{_____}}{\text{Sq. In.}}$

Measurement of Doors:

$\frac{\text{_____}}{\text{H. Inches}} \times \frac{\text{_____}}{\text{W. Inches}} = \frac{\text{_____}}{\text{Sq. Inches}} \times \frac{\text{_____}}{\text{\# Doors}} = \frac{\text{_____}}{\text{Glass in Doors}}$

$\frac{\text{_____}}{\text{H. Inches}} \times \frac{\text{_____}}{\text{W. Inches}} = \frac{\text{_____}}{\text{Sq. Inches}} \times \frac{\text{_____}}{\text{\# Doors}} = \frac{\text{_____}}{\text{Glass in Doors}}$

Add total square inches of window rough openings and door glass.

Total = $\frac{\text{_____}}{\text{Sq. Inches}}$ **

****This amount should equal or be greater than the amount of open area needed.**
